MP2-1 Panel MI: The Home Gateway Initiative

January 9, 2006

Moderator: Stan Moyer, Executive Director, Telcordia Technologies

The Topic

- The Home Gateway Initiative (HGI) — <http://www.homegateway.org> — was formed in March 2005 to *boost the market of home communication services to the millions of broadband customers* served by its founding members.
- The initiative, with already more than 60 members (as of end-of-year 2005), is *driving the development of specifications of broadband residential gateways supporting the delivery of multi-play services*.
- The panel will give an overview of the developments of the HGI and its objectives with a particular emphasis on the impact of home gateway on the end to end network provisioning and delivery platform of triple play services.

The Panelists

- *Overview of the HGI: Objectives and Results* — Paolo Pastorino, CTO, The Home Gateway Initiative
- *The Importance of the Home Gateway – Service Provider Perspective* — Roger Clark, BT
- *Home Gateway/Networking Integrated Management Solutions* — Motive, Heather Kirksey
- *Broadband Home Standardization Domain* — Klaus Milczewsky, Deutsche Telekom
